A. CLASSIFICATION OF SUBJECT MATTER IPC 7 H04Q3/00		
According to International Patent Classification (IPC) or to both national classification and IPC		
B. FIELDS SEARCHED Minimum documentation searched (classification system followed by classification symbols) IPC 7 H04Q		
Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched		
Electronic data base consulted during the international search (name of data base and, where practical, search terms used) EPO-Internal, WPI Data, PAJ		
C. DOCUMENTS CONSIDERED TO BE RELEVANT		
Category *	Citation of document, with indication, where appropriate, of the relevant passages	Relevant to claim No.
A	EP 1 271 881 A (SIEMENS AG) 2 January 2003 (2003-01-02) abstract paragraph '0005! paragraph '0024! -----	1-25
<input type="checkbox"/> Further documents are listed in the continuation of box C.		
<input checked="" type="checkbox"/> Patent family members are listed in annex.		
* Special categories of cited documents : *A* document defining the general state of the art which is not considered to be of particular relevance *E* earlier document but published on or after the international filing date *L* document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified) *O* document referring to an oral disclosure, use, exhibition or other means *P* document published prior to the international filing date but later than the priority date claimed *T* later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention *X* document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone *Y* document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art. *&* document member of the same patent family

Zu Punkt V.

Der nächstliegende Stand der Technik wird im folgenden Dokument beschrieben:

D1 = EP1271881

Dieses Dokument beschreibt eine Anordnung und ein Verfahren zur Bereitstellung von Komponenten für eine Informationsaufgabe.

Die gelöste Aufgabe der Erfindung besteht darin, dass die Dienstanbieter mit erheblichem Aufwand, nämlich Anschaffung und Wartung von dedizierter Hardware verbunden werden.

Keines der bekannten Dokumente schlägt die in der vorliegenden Erfindung gewählte Lösung vor, d.h. eine Versorgungsvorrichtung für geänderte oder neue Komponente von Informationsaufgabe, auf welche die Dienstanbieter Zugriff haben und eine Bereitstellungsvorrichtung zu der von der Versorgungsvorrichtung geänderte oder neue Komponente von Informationsaufgabe übertragbar sind, wie in Anspruch 1 (Anordnung) und in Anspruch 14 (Verfahren) definiert.

Diese Erfindung ist im technischen Gebiet auch nicht naheliegend. Daher beruht der Gegenstand des Anspruchs 1 und 14 auf einer erfinderischen Tätigkeit.

Re Item V.

The nearest prior art is described in the following document:

D1 = EP1271881

This document describes an arrangement and a method for providing components for an information task.

The problem solved by the invention is that of relieving the service providers of considerable expense, namely procurement and maintenance of dedicated hardware.

None of the known documents proposes the solution selected in the present invention, i.e. a supply device for changed or new information task components to which the service providers have access and a provision device to which changed or new information task components can be transmitted by the supply device, as defined in Claim 1 (arrangement) and in Claim 14 (method).

Also the invention is not obvious in the technical field. The subject matter of Claims 1 and 14 is therefore based on an inventive step.
